2026 US List Prices

Revised 22 August 2026

Cortina.026 · Zeroquindici.015 · Ventiquattrore.h24 · Sempreverde.040

This list, Pricelt and the four price books all carry the same figures. The price books were repriced to this revision on 22 August 2026 and every price page in them is stamped with that date. This document exists so all four collections can be read, searched and sent as one file; the books remain the place to find dimensions, materials, ground-fixing, configuration rules and product photography.

Black (RAL 9005), Anthracite (RAL 7024) and Signal White (RAL 9003) are priced at the base. The nine premium RAL colours and Corten Effect carry the upcharge printed for each product. Custom RAL is quoted individually — it needs additional testing and approval, extended lead times, minimums and additional cost.

All prices are US list, freight included, and are subject to change. This is a list for budgeting; sales@urbantime-usa.com confirms lead times and final pricing.

Items marked **PROVISIONAL** were added after the 2026 edition went to press. They now appear in an addendum at the back of their book. Their base price is derived and their model number is proposed, not yet issued by Diemmebi. Confirm before quoting.

Notes on this revision

What changed

Base prices were revised on 22 August 2026. Every other finish keeps the dollar upcharge printed for that product in the 2026 price book, so the relationship between the base and the premium colours is unchanged. Rows shaded in the tables above are the ones that moved.

Cortina.026

The printed Cortina book charges the same price for all thirteen finishes. This revision introduces the colour upcharge that Diemmebi charges in euros — between +3.4% and +14.8% depending on the product. Cortina is the only collection where the upcharge itself is new.
